Test Script

Every feature of Kageflow, step by step, with what you should see.
Mark each step Pass, Fail or Blocked.

VERSION	DATE	STEPS	TIME

How to use this script

Work through every section in order, as one dealership, and mark each step Pass, Fail or Blocked. It takes about 3 hours in full; sections 1, 3, 5 and 11 are the core and take about an hour.

Before you start

- Use the live app at **app.kageflow.co.za** on a laptop with Chrome, and have an Android phone for section 12.
- Set each step's Result to **Pass**, **Fail** or **Blocked** (you couldn't do it because something earlier failed). Write anything odd in Notes, even on a pass.
- Use made-up customers and cars, never a real customer's details.

You need three email addresses you can open:

ACCOUNT	USED FOR	ROLE
Tester A	Owner of the test dealership "Test Motors"	Owner
Tester B	A salesperson at Test Motors	Sales
Tester C	Owner of a second dealership, "Other Motors"	Owner

Have ready: one real VIN from a car you can look at, three photos of a car on your phone, and a CSV from a bank account or a spreadsheet of customers (sections 7 and 9).

Pass it did what the step says

Fail it didn't

Blocked an earlier failure stopped you

13.5	Click **Book a demo**	An email opens to sales@kageflow.co.za, copied to enquiries@	☐ Pass ☐ Fail ☐ Blocked	
13.6	Open www.kageflow.co.za/privacy and send a test email to info@kageflow.co.za	Privacy policy loads; the email arrives in the inbox	☐ Pass ☐ Fail ☐ Blocked	

Reporting a problem

For every Fail, send these four things to the WhatsApp group or info@kageflow.co.za:

1. The step number, for example 5.4.
2. What you did and what happened instead.
3. A screenshot of the whole screen, including the address bar.
4. The time it happened, so the logs can be checked.

When you finish, delete Test Motors' test data or tell Tanatswa, and don't reuse these accounts for real customers.
